Derco Repair Services commemorates 20 years of aerospace excellence

June 15, 2006, MILWAUKEE, Wis.—Derco Repair Services, a Milwaukee-based aerospace company, commemorated its 20th year serving the international aerospace industry. Founded in 1986, the company has grown from a staff of two to a company employing more than 60 employees. Acquired in 2002 by Sikorsky Aircraft Corporation, Derco Repair Services, Inc. continues to grow and is looking to hire aviation mechanics at its Milwaukee, Wisconsin facility.

“Derco Repair Services was created because there was a critical need within the market for quality component repairs and component management,” said Derco Repair’s Operations Manager, Jason Wiedoff, who has been with the company since 1992. “We take immense pride in continually expanding our business to meet the needs of our customers worldwide. If bringing a capability in-house is more beneficial for our customers, we develop that capability.”

From the beginning, Derco Repair Services has provided industry-leading, quality component repairs for military and commercial aircraft around the world. Derco Repair services started within the walls of Derco Aerospace. In 1996, Derco Repair Services built a new, state of the art 50,000 square foot repair facility next to the Derco Aerospace building. In 2001, the repair sector of the company expanded to include 10,000 additional square feet to accommodate the expansion of its pneumatics capabilities. Most recently, Derco Repair Services

acquired a second building across the street to facilitate further capability expansion.

In 2006, Derco Repair Services is expanding its repair and overhaul capabilities to include commercial and military fuel components. In a move to better serve its customers worldwide, Derco is bringing the fuel component repair and overhaul capability in house to reduce customer cost and shorten turn-around times.

Derco Repair Services will celebrate its 20th year milestone at a private event. For more information regarding Derco Repair Services or its offerings, please call (414) 355-3066 or visit the Derco Web site at www.dercoaerospace.com.

About Derco Repair Services

Founded in 1986, Derco Repair Services, Inc. provides the best value and highest quality repair and overhaul of aircraft components and accessories to military and commercial operators around the world. Derco Repair Services is an FAA-Certified Repair Station and an OEM-Authorized Repair Station. Derco Repair is located in a 60,000 square foot state-of-the-art facility that utilizes modern testing systems that are designed and developed by Derco's platform experienced, in-house engineering department. Located in Milwaukee, Wisconsin, Derco Repair Services is a wholly owned subsidiary of Sikorsky Aircraft Corporation. Sikorsky is a subsidiary of United Technologies Corporation (NYSE:UTX), of Hartford, Connecticut, which provides a broad range of high-technology products and support services to the aerospace and building systems industries.
