Derco Aerospace continues to support RNLAF aircraft sale

April 11, 2007, Milwaukee, WI— Derco Aerospace, Inc. continues to supply critical material in support of the Royal Netherlands Air Force (RNLAF) program, which will provide the RNLAF two C-130 aircraft, doubling the operation's fleet. To date, Derco has supplied more than 35,000 parts in support of the refurbishment of the two unique RNLAF aircraft.

Derco continuously monitors key suppliers to ensure all deliveries meet program schedule requirements. In addition, Derco Repair Services manages all overhauled rotatable components in support of the program.

"Derco is pleased with the success of the partnership between Derco and Marshall Aerospace in support of the Royal Netherlands Air Force aircraft sale program," said Bill Ochsner, President of Derco.

In addition to Derco's current supply support role, Derco coordinated the initial aircraft sale, disassembly, and aircraft move from Tucson, AZ to Marshall of Cambridge Aerospace's facility via land/ocean. Derco, working in collaboration with Marshall, will continue to provide the RNLAF with all necessary parts essential to deliver two fully refurbished aircraft. Refurbishment labor and services will be provided by Marshall at its UK facility.

"From the dismantle of both aircraft in Tucson, Arizona in 2006 to the current state, tremendous progress has been made to provide the RNLAF with an

outstanding solution to meet its tactical airlift needs,” said Ochsner. “From desert conditions to their trip across the Atlantic Ocean, these aircraft have made the journey to becoming valuable assets to the Royal Netherlands Air Force.”
