Derco expands agreement with Telair to include exclusive distribution to the United States government

Milwaukee, Wis., April 23, 2010 – Derco Aerospace, a Sikorsky Aerospace Services company, announced today it has reached agreement with Telair International to expand its existing distribution agreement in which Derco will now exclusively distribute Telair’s line of fixed-wing actuators, valves, winches and related piece parts to the U.S. Government. Sikorsky Aerospace Services is the worldwide aftermarket business of Sikorsky Aircraft Corp., a subsidiary of United Technologies Corp. **(NYSE: UTX)**.

Telair’s line of innovative military aircraft products are standard equipment on a wide variety of aircraft around the world. Previously, Derco exclusively distributed Telair’s military aircraft products to the international market. This new agreement expands on this arrangement by adding distribution of Telair’s products to the U.S. government.

“Telair has been a longstanding partner of Derco, providing quality products that serve both military and commercial applications,” said Paul Fuhrmann, Director of OEM and Repair Solutions. “We value the trust Telair has placed in our capabilities and the opportunity to exclusively distribute their products to both the U.S. Government and international communities.”

For more information regarding Telair International’s products or Derco Aerospace, please call (414) 355-3066 or visit www.dercoaerospace.com.

- MORE -

Founded in 1979, Derco Aerospace, Inc. is based in Milwaukee, Wis., and is a world leader in providing aircraft spares distribution, logistics solutions, repair services and technical solutions to customers around the globe. Through solid relationships with premier original equipment manufacturers (OEMs), Derco maintains one of the largest and most diversified aircraft spares inventories in the world.
