## **Decrease your QEC downtime with Derco Repair Services' efficient C-130 QEC repair, overhaul, and upgrade capabilities.**

No competitor can match the depth of Derco Repair's in-house QEC services. Derco Repair distributes 100% of all C-130 structural components, provides repair/overhaul expertise of QEC rotatable components, and offers complete repair, rework, and upgrades to the QEC structure.

At Derco Repair, all repairs, overhauls and inspections are accomplished in-house, including non-destructive testing and repair of structural components—longerons, cross beams, firewall and more. Derco Repair also provides complete structural component upgrades, such as longerons, cross beams, hoses, firewalls, and harnesses.

Derco Repair can implement any Service Bulletin, Technical Order or Directive required by governing authorization bodies.

### **Derco Repair's comprehensive QEC services include:**

- Complete Inspection of the QEC
- Non-destructive testing of longerons, cross beams, LORD mounts, and firewall.
- Structural repair including longerons, firewall, cross beams, and chin scoops, etc.
- Services include commonly replaced parts like hardware, camlocks, screws and clamps
- Access to Lockheed Martin resources, including engineering diagrams, and original specifications
- Upgrades to structural and internal parts, including hoses, harnesses, cross beams, longerons and firewalls
- Exchanges available of the entire QEC, subassemblies, cowlings, powermounts, chin scoops, and oil ducts
- In-house distribution stock of all structural QEC components, including both original part numbers and replacement rotatable components
- In-house repair capability for 98% of QEC components

*Derco Repair is an FAA & OEM authorized repair station and is a Lockheed Martin C-130B-H Licensed Repair Center for overhaul of QEC components and accessories.*
